## Specification Sheet

UNI 125 Anchor Seal

The **UNI125 Anchor seal** is a sophisticated security seal constructed in polycarbonate (PC) body, polyacethal (POM) and steel wire. It is supplied in one piece ready to use with the **anchor pre-assembled** into the body to prevent tampering before use. **Duplicate numbering is laser-printed** onto body and insert for an enhanced security.

The UNI125 can be assembled with **sealing wire pre-attached**, allowing simple application to all kinds of utility meters. The UNI125 is available in **three versions**, with **long** or **extra-long** versions available with white panel for barcode printing.

Available in three sizes:
Standard: 22x19mm
Long (L): 31x23cm
Extra-Long (XL): 31x32cm

Applications
Utility meters (gas, electrical and water meters), petroleum, taxi, telecommunication & postal sectors.
