

Snap-N-Secure Pallet Seal

The patented **Snap-N-Secure** pallet seal is the only pallet seal on the market which addresses the **most vulnerable point** of pallet straps – the metal crimps. Application could not be easier; the seal simply clips around the banding with **hand application**.

Any tampering attempts will cause the **high-strength polycarbonate** to crack at predetermined **indication points**, or shatter completely, ensuring tampering is obvious. The Snap-N-Secure can be applied to most standard steel or poly banding, without the use of any tools. **Pallet security made simple.**

1. Apply shrinkwrap, banding and crimps as normal

2. Slide Snap-N-Secure under crimp, between banding & shrink-wrap

3. Close and apply hand pressure to close the lid shut

4. Indicators will protrude indicating that seal is fully closed

Sizing Guide

Compatible with steel / poly banding upto 19mm, & crimps upto 22mm wide x 32mm long

Material

Clear, high-strength polycarbonate

Standard & Customisation

As standard, marked: SECURED & sequentially no'd
Custom-printed available upon request – MOQ's may apply.

Packaging

Quantity: 50pcs per carton, 250pcs per case
Carton Dim: 53x8x19cm (carton)
